Kathy as requested here is the mandatory language for water with Fecal Coliform or E. coli:

Fecal coliforms and E. coli are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems

Karen D. Johnson, Chief  
Ground Water & Enforcement Branch

[attachment "Dimock Qs and As Jon C comments).docx" deleted by KarenD Johnson/R3/USEPA/US]

Dennis - I tried to fill in some blanks on the Q and As document and did some other edits. As we get some breathing room over the next day or two it would be good to try to consolidate some of these - a whole lot of specific questions here and Bob S wants us to migrate some to the web site. If you need some C2 help, please let me know.

Thanks and hang in there - you are doing a great job! Holler if we can help.

Jon
